COVERT

COCKROACH GEL BAIT

21.5g/Kg Imidacloprid

Sold in 30g tubes, individually boxed, PCT's COVERT cockroach gel bait features:

- Speed of Action** - Cockroaches begin dying in as little as 20 minutes after eating the bait.
- Active on all common species** - cockroaches including *Blattella germanica* (German cockroach), *Periplaneta americana* (American cockroach) and *Supella longipalpa* (Brown-banded cockroach).
- Unique food grade attractants** - which are intentionally different from other popular baits, making Covert the ideal choice for bait rotation to prevent bait aversion.
- Formulated** without the eight most common food allergens - for sensitive applications such as food plants, schools, child care and health care facilities.
- Low dose rates** - use as little as 0.1g of gel per application point.
- Suitable** for use in conjunction with a non-repellent spray treatment.
- Broad Label claims** - use Covert Gel in an extensive range of physical situations - see the label for examples.

COVERT GOLD

COCKROACH GEL BAIT

0.5g/Kg Fipronil

Also sold in 30g tubes, individually boxed, PCT's COVERT GOLD cockroach gel bait has these distinctive features:

- Proven secondary kill** - when other cockroaches are exposed to carcasses and droppings of cockroaches that have already eaten the bait. This even extends to subsequent instances of exposure.
- Safety of Application** - when used as per label rates, Covert Gold presents a negligible risk to people.
- Low dose rates** - used at label rates ensures minimal disruption during treatment, and ensures maximum cost effectiveness.
- Extensive Label Claims** - use Covert Gold in a wide variety of physical situations as per the label.

You can now avoid potential cockroach insecticide resistance by rotating within PCT's range of insecticidal gels - select from 3 specific actives, *Imidacloprid* (COVERT), *high-load Fipronil* (COVERT GOLD) & *Abamectin* (AVERT Cockroach Gel Bait).
