

DIFENATE

ALL WEATHER BLOCKS RODENTICIDE

containing 0.05 g/Kg difenacoum

SureFire DIFENATE rodent blocks offer these benefits:

- only a single feed needed to kill all rats and mice
- controls anticoagulant resistant rodents.
- bait formulation has proven attractiveness to rodents.
- very potent to rodents compared to non-target species, making it particularly useful where domestic or farm animals are present.
- distinctive purple dye gives positive identification of the active.
- contains Bitrex® to help prevent accidental human ingestion.

Check out overleaf for details.

SureFire[®] DIFENATE

ALL WEATHER BLOCKS RODENTICIDE

Surefire Difenate All Weather Blocks Rodenticide is a palatable all-purpose wax-based rodenticide formulation based on the advanced anticoagulant, difenacoum, which is equally effective against rats and mice, including strains resistant to some other anticoagulants. In some circumstances more than one feed may be required to produce mortality that generally occurs 4-10 days after consuming the bait.

Surefire Difenate blocks are especially suited for use outdoors and in damp situations and are ideal for burrow baiting. The central hole in the block allows for fixing in bait stations, and for nailing or wiring in place to help prevent block carriage by rodents. Indoors, Surefire Difenate can be used in homes, factories, offices, public buildings, rural and industrial premises.

Surefire Difenate blocks are sold as 15g average weight, and contain denatonium benzoate (a human taste deterrent) to help prevent accidental human consumption.

The bait is hazardous to pigs, cats, dogs, poultry, birds and wildlife and care should be exercised in its use. **DO NOT** place baits in locations that are accessible to domestic animals, livestock, birds or other animals. **DO NOT** contaminate dams, waterways and drains with bait or its used containers. **DO NOT** use this product to control native animals. The product is restricted to use in and around buildings (within 2 metres) or within enclosed spaces. In areas where possums and other non-target animals frequent, baits should be secured inside proper bait stations or bait stations constructed from drainpipes or boxes.

Surefire Difenate blocks are available in these sizes:

150g soft pouch	20 per carton
1Kg soft pouch	10 per carton
2.4Kg pail	4 per carton
8Kg pail	32 per pallet

APVMA approval No 69911/62048
